BALLISTIC RUBBER BLOCKS

SUNFLEX
BALLISTIC RUBBER PRODUCTS

Ballistic rubber blocks are produced from recycled rubber with a special binding composition.

Ballistic rubber blocks are used to stop bullets, which helps to prevent ricochets, splatter, and sound abatement and reduce airborne lead containment of standard pistol and rifle rounds up to .308/7.62mm.

Sunflex Ballistic rubber blocks are designed with a proprietary hot mould compression system and an interlocking pattern. This offers capabilities and performance with superior quality and durability.

Due to its wide rubber surface area, it has a tendency to encapsulate ammunition up to 7.62 mm.

This helps in self-healing properties to close the

bullet path after the round has penetrated the surface, so each bullet is encapsulated inside the ballistic rubber block.

Sunflex's unique capabilities, performance, intellectual property, proprietary design, and technology keep us apart from other recycled rubber compositions. Withstand extreme conditions without degrading material.

Ballistic rubber blocks are the building product for bullet trap encapsulation, shoot houses.

Rubber blocks can be utilised to create cornerstone products for a variety of live range, security, and military applications.

Sunflex Ballistic rubber blocks are available in various dimensions.

Dimensions (mm)	Dimensions (inches)	Weight per block	Colours Availability
01 500mm x 300mm x 300mm	20"L x 12"W x 12"H	38kg	Basic Black
02 610mm x 305mm x 228mm	24"L x 12"W x 9"H	38kg	Basic Black
750mm x 300mm x 200mm	29.52"L x 11.81"W x 7.871"H	38kg	Basic Black
305mm x 305mm x 228mm	12"L x 12"W x 9"H	18kg	Basic Black
1220mm x 610mm x 222mm	48"L x 24"W x 8.75"H	140kg	Basic Black
915mm x 305mm x 228mm	36"L x 12"W x 9"H	50kg	Basic Black
