PORTABLE BULLET TRAP

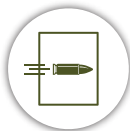

SUNFLEX
BALLISTIC RUBBER PRODUCTS

Sunflex range divisions are dedicated to devising and engineering the highest quality portable bullet traps. We manufacture portable projectile traps utilising AR500 steel combined with our proprietary ballistic rubber.

Together, both steel and rubber can effectively neutralise rounds, contain all lead dust, and eradicate ricochet and back splatter. Portable gunshot traps are among the essential devices utilised in military, law enforcement, home and commercial training.

Ballistic rubber products are insufficient to withstand the bullets independently; they require a steel backing for effective protection. The primary benefit of portable projectile traps lies in their suitability for close-range firing tactics across diverse angled shooting ranges.

Assault rifles possess higher velocity projectile trajectories, making them suitable for use in controlled shooting range environments. With the assistance of portable bullet targets, you can engage in rifle shooting using close-range tactics.

The projectile traps are adaptable and can be repositioned within the tactical shoot house as needed. It extends the durability of walls in close-quarters combat during shooting.

Shooting Area Surface: 20" x 36"

Shooting Area Surface: 24" x 45"

PORTABLE BULLET TRAP

SUNFLEX
BALLISTIC RUBBER PRODUCTS

Features:

- The product is made with AR500 steel backing in sizes 8 mm and 10 mm.
- Support of solid rubber tyre with locking wheels for easy mobility.
- The trap has the capability to defeat up to .308 / 7.62 calibres.
- The shooting area surface can be customised with individual range specifications.
- The trap is simple and easy to relocate within, allowing one person to quickly set up various training scenarios.
- No Ricochet or Back-splatter.
- Custom designs featuring an air gap and collection trays facilitate lead recovery.
- It is fully assembled and ready to set up and use in a few minutes.
- In order to prolong the lifespan of ballistic rubber pieces, they may be rotated from high volume areas.
- Accommodates rounds with minimum velocities of 600 FPS up to a maximum of .308/7.62mm
- The use of tracers or any other incendiary-type round is prohibited.

Shooting Area Surface: 48" x 35.90"

Shooting Area Surface: 27.55" x 31.49"
