

RUBBER RIFLE BENCH STAND

SUNFLEX
BALLISTIC RUBBER PRODUCTS

Rubber rifle bench stand is produced from recycled rubber with a special binding composition. Rubber bench stands are superior alternatives for sandbags and metal rest replacements.

These are produced using our innovative hot mould compression system. Durability and performance are far superior compared to other recycled rubber compositions.

Withstand extreme conditions without degrading material. This feature provides a stable rifle rest during live firing usage.

Rubber rifle bench stand has several advantages compared sandbags and metal rests.

Recycled rubber material will not scratch the finish of your weapon.

Environment friendly made from recycled rubber composition.

It will not deteriorate, freeze or become waterlogged, absorb water.

There is no need to refill or replace the sandbags. Durability lasts far more extended years.

The design has been engineered with a unique pattern to ensure all possibilities for adjusting heights and replacing sandbags.

The stacking is not necessary to accommodate larger capacity magazines.

Provides three resting heights.

The sizes are 4 inches, 7 inches, or 9 inches. The 9-inch-high rest position is ideal for benching ARs and AKs fitted with 30-round magazines.

These are the best alternatives to sandbags for support while shooting. They are lightweight and easy to transport.
