BALLISTIC RUBBER DUMMY TARGETS

SUNFLEX
BALLISTIC RUBBER PRODUCTS

Sunflex ballistic rubber dummy targets are life-size 3D torso targets made from 100% recycled rubber.

They are capable of withstanding thousands of rounds from both rifles and pistols.

Law enforcement agencies around the country rely on their innovative self-healing material because it enables projectiles to pass through with minimal deformation and almost no degradation.

Applying a thin layer of spray paint forms an outer "skin" that changes its appearance in response to impacts, giving shooters instantaneous visual feedback for where to aim their shots.

This "skin" is removable and easily reapplied, so you can have a new surface to aim at in no time.

Indoor ranges, tactical training houses, and self-defence education benefit greatly from using rubber dummies instead of steel targets because shots can pass through them. They pose no threat even when fired from a distance.

Ballistic rubber dummy targets are a dependable method for enhancing accuracy, evaluating shot placement, and preparing for real-world scenarios where precision is essential, regardless of whether they are used by law enforcement, military personnel, or shooting enthusiasts.

SPECIFICATIONS

- Dimensions: Width 470mm (18.5") x Height 950mm (37")
- Body Thickness: 140mm (5.5")
- Face Thickness: 150mm (6")
- Weight: 25kg / 55.11lbs
- Accessory: The base stand and moving targets are available as additional options.

FEATURES

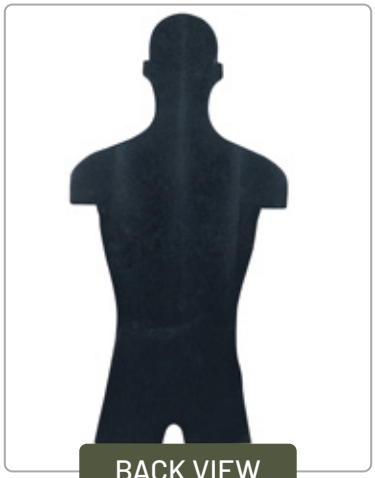

- Self-healing ballistic rubber.
- Oblique training with the real 3D target.
- Rapid identification of impacts.
- Aim at the other side.
- Real-time tactical instruction.
- The following rounds have been evaluated up to 7.62 calibers.
- 5,000 to 10,000 rounds should be expected to last.
- Can be quickly and simply painted over.

The base stand is available as an additional option.
